DETAILED ACTION

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. §102 or §103 would be proper. Although the prior art teaches a variable focus lens comprising a fluid chamber containing a first liquid and a second liquid wherein the liquids are non-miscible and in contact over a meniscus, a means for applying an electric field over the fluid chamber such that the shape of the meniscus varies in dependence of the electric field, the prior art fails to teach such a lens wherein the first and second fluids have an index of refraction and Abbe number satisfying the conditional constraint as claimed in independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goosey, Jr. et al (U.S. Patent Number 7,265,911) teaches a zoom lens system having a variable focus lens.
